Be Proactive - A few ideas for both the Industry and Law Enforcement.

Industry

- Use the NER Spring Crime Prevention Tune-Up to make security a part of summer preparations.
- Ensure alarms and lighting are all operating properly. A high number of false alarms may be a test of your responsiveness; watch for vehicles "casing" your property.
- Test cameras in daylight and after dark to confirm you capture usable images of license plates, faces, and vehicles.
- Don't assume that fences and gates provide a complete barrier to adjoining property. Walk your fence line to be sure everything is intact. Thieves partially cut fence posts or stack materials near a wall in preparation.
- Move highly targeted equipment into service bays and away from the fence.
- Contact neighboring businesses, especially those which will be open during the holiday; raise their awareness so that thefts in progress are reported to 911. Be sure they have your emergency contact information.
- Designate someone to check up on the facility at different times during the holiday. Random activity at your location could spoil a thief's planning.
- Don't leave ANYTHING on a trailer. Secure any trailers so that thieves cannot use them to steal your equipment.

Law Enforcement

- Educate personnel on the heightened equipment theft threat, and to contact NICB for assistance at 800-447-6282.
- NICB can provide NER's equipment ownership information on machines, including most rental equipment.
- NER maintains emergency contact information for owners, fleets and rental companies whose equipment is registered with NER.
- NCIC cannot confirm a machine is NOT STOLEN. Contact NICB for NER ownership registration on any suspicious machine that come back negative for theft and verify its status with the owner.
- Law Enforcement may search NER's owner registration data online. Register for at <https://application.ner.net/NER>.

Review your fleet inventory on NER

- Update your NER fleet registration to add any new machines.
- Physically verify that the serial numbers/PINs recorded on your inventory match what is actually on the machine ID plate.
- Confirm that your emergency contact details are accurate on your NER registration.
- If you have difficulty logging in, call an NER analyst 866-663-7872, or email info@ner.net.
